## CHOOSING A COLOR FOR YOUR BIKE

Now that you've ordered your special bicycle, it's time to think about colors. The price of your bike includes painting it in a single stock color. But a special bike deserves a special finish, like those shown on the next page. How about a vertical or horizontal fade? Maybe you like the classic look of panels or perhaps a two-tone effect. You'll find twenty stock colors to choose from, as shown here and on my website ([georgenaterry.com/colors](http://georgenaterry.com/colors)). If none of these appeal to you, I can send you a book with hundreds of custom colors to inspire you and make you crazy.

## HOW MUCH WILL IT COST?

Additional charges for custom paint schemes using any of the stock colors are as shown below. If you choose custom colors, the price will depend on the colors you choose.

Vertical, Diagonal and Horizontal fade: \$180.00

Panels on seat and down tube: \$240.00

Rear triangle one color/ front triangle another color: \$180.00
